EXECUTIVE SUMMARY

Granite Bay Dental completed May 2026 with 95 automation runs processing 827 tasks at a 97.9% success rate. New Patient Intake led activity this month, keeping routine work off your team's plate.

2 run(s) encountered errors, accounting for roughly 0 minutes of downtime. Addressing those items early will protect momentum going into next month.

WINS THIS MONTH

- 827 tasks automated across 95 runs
- 97.9% overall success rate for May
- Specialist Referral Drafts processed 162 tasks
- New Patient Intake was your most active automation
- 2 error run(s) flagged for review

LOOKING AHEAD

Prioritize any automations with errors or paused status, refresh credentials where needed, and align with Clinovyr on one high-impact workflow to optimize in the coming month.

NEXT STEPS

Review any automations with errors, confirm credential renewals, and schedule a brief check-in with your Clinovyr team to prioritize improvements for May.

Methodology & Definitions

This report summarizes automation activity captured by Clinovyr-managed workflows.

Success rate reflects completed runs without unhandled errors. Tasks automated counts discrete actions your team would otherwise perform manually — form entries, messages sent, records updated, and similar operational steps. Estimated downtime aggregates error-run duration as a conservative proxy for interrupted service. ROI estimates use a blended staff hourly rate applied to modeled time savings; your finance team may prefer different assumptions for board reporting.

Clinovyr recommends reviewing automations with elevated error rates first, then optimizing the highest-volume workflows for additional throughput. Contact your Clinovyr partner to schedule a monthly optimization session or to enable additional playbooks aligned with your industry.

This report summarizes automation activity captured by Clinovyr-managed workflows.

GLOSSARY

Automation run: A single scheduled or triggered execution of a workflow. Task: A discrete unit of work completed within a run (e.g., one message, one record sync). Success rate: Successful runs divided by total runs. Error run: A run that ended in a recoverable or actionable failure state. Downtime estimate: Summed error-run duration converted to minutes. These definitions align with Clinovyr dashboard KPIs and may be exported for compliance documentation.
